TASTE, UMAMI

Algae Powder Gold stands out with its unique deep-yellow, gold-like colour. This gold powder has a complex flavour profile which starts sweet, slowly changes to umami and has a sweet and slightly sour after-taste.

TASTE FRIENDS

Algae Powder Gold is a source of Omega 3 and 6 and is suitable for a multitude of applications and combinations, from savoury dishes to sweet desserts.

ORIGIN, HOW IT ALL BEGAN

Algae have been proven to exist for over 2 billion years on our globe, making it a vital asset of the earth's ecosystems. The Aztecs have the oldest registered encounter of algae consumption. Spanish conquistadors found the indigenous people fishing a blue-green slurry from the water, which they dried in the sun to be consumed for their powerful source of chlorophyll (leaf green) and contain a high content (> 60%) of proteins, vitamins, trace elements and Omega 3 fatty acids.

This algae powder is from the Chlorella genus and were first discovered in the canals of Delft, the Netherlands by M.W. Beijerinck in 1889. There are over a hundred varieties of this algae, making it possible to select specific types of Chlorella for their aromatic and visual properties. Algae can become an important and sustainable replacement for animal protein. Algae are also said to help cleanse the body, provide extra energy and support the immune system.

AVAILABILITY

Algae Powder Gold is available all year round and can be stored for up to two years at a temperature of 12–16°C.
